**Bearden**  
 INVESTIGATIVE AGENCY

## Unlock the Truth with Mobile Forensics

For years, mobile forensic extraction has been something only found available to law enforcement agents. Due to the increased demand for mobile forensics, Bearden Investigative Agency has partnered with Black Swan digital forensics to perform this highly valuable service for our clients.

Our skilled agents have the experience needed to extract, preserve and analyze data from mobile devices. We utilize specialized techniques with advanced tools and equipment. Our highly trained staff ensures data is meticulously preserved so it is admissible in a court of law.

**Data doesn't lie. Unlock the truth and get the facts you need for your case.**

Did you know ...

- **No video or picture taken on a cell phone is ever lost!** Even after deleting, a digital imprint remains which we are able to recover and document.
- **We extract a detailed GPS history of the device which includes maps and routes.** Where was the user on the date and time in question? What were they doing? Who were they with? What devices were connected via Bluetooth? We can answer all these questions.
- **Social medial activity on the device is documented in detail.** Every tweet, like, share, swipe and comment are there for our review. We've seen it all, and this aspect of mobile forensics typically provides an eye opening wealth of information.
- **Our software evaluates all incoming and outgoing calls relative to the device.** We track and analyze the call log to provide you with a concise and admissible document.
- **Contacts are key! Valuable insight is gained by evaluating information tied to contacts.** From contacts entered and altered by the user to ones retrieved from other sources, we are able to make detailed associations and analysis of this data.
- **Gaining access to the user's daily activities by analyzing Calendars and Scheduled Tasks is invaluable.**
- **We run specific searches for terminology, words or phrases.** Looking for use of company branded terminology in communications? We can provide every incident.

If mobile data extraction is vital for your case, contact the skilled agents at Bearden Investigative Agency. 1.800.943.2670
